General information

→ On very cold mornings, it can take up to 25 minutes for the unit to defrost and begin blowing warm air after it's turned on.

→ The thermostat will make the unit turn off and on to keep the room at the selected temperature.

Turning the unit on and off

1. Turn on the unit by pressing the on/off button once (a green light will indicate the unit is on).

2. Once on, to turn off, press the on/off button once.

homes victoria

**VICTORIA** State Government

How to select the cooling or heating mode

1. Press the **Mode** button several times until either **Cool** or **Heat** is selected (ignore the other options).

How to change the temperature

1. Select the temperature setting by pressing either the ▲ **up or** ▼ **down arrow**.

2. Pressing the ▲ **up arrow** increases the temperature and pressing the ▼ **down arrow** decreases the temperature.

* *A comfortable temperature is typically between 18–24 degrees.*

How to select the fan speed

1. Press **Airflow** setting button in the lower left hand corner.

2. Use ◄ **left and** ► **right arrows** to select either fan speed or fan direction.

3. When selecting the fan speed, the ▲ **up and** ▼ **down arrows** select the speed level.
